

.Net Application Developer

Interwest Consulting Group is an industry leader in providing municipal services to cities and counties throughout the Western United States. We currently have more than 370 employees specializing in public works, building and safety, real estate acquisition, information technology and geographic information systems. We have attracted the best in our professions and are positioned for continued growth and success. Perhaps you could be part of this success?

We are looking for a qualified .Net Application Developer with hands-on experience. You will be responsible for assisting with the design/redesign of current systems while performing troubleshooting and performance tuning.

As a member of the IT team, you will work closely with the Manager and Senior Network Engineer to ensure system consistency and stability. Communication and organization skills are keys for this position, along with a problem solving attitude. Thinking outside of the box is highly encouraged! Must have experience with BOTH SQL Server Administration AND Development. Visual Studio 2010 and newer experience with a focus on ASP.NET and familiarity with IIS as a must.

Duties/Responsibilities:

- Configure database servers and install software
- Proactively monitor system health and security
- Design backup/maintenance processes for servers and associated data
- Manage user access and security
- Generate and document disaster recovery plan/process
- Provide end-to-end technical support and problem resolution including after hours (on-call) support
- Schedule and perform regular server maintenance
- Analyze data management procedures and provide recommendations for best practices/enhanced performance
- Design and maintain stable, reliable and effective database objects including Tables/Views/Stored Procedures/Triggers/Functions/Indexes
- Optimize and maintain legacy systems
- Modify databases according to requirements
- Solve database usage issues and malfunctions
- Liaise with developers to improve applications and establish best practices
- Gather user requirements and identify new features
- Develop technical and training manuals
- Provide data management support to users
- Ensure all database programs meet company and performance requirements
- Research and suggest new database products, services and protocols
- Work with existing application architect to understand existing framework and outline strategy and plan for next generation solution and features
- Lead development of next generation solution, including new modules & features, including hands-on development activities

Qualifications/Skills:

- Bachelor's Degree in Computer Science or Computer Engineering (or comparable work experience)
- 5+ years professional experience
- Experience with MSSQL 2008 and newer
- Advanced knowledge of database structure and theory
- Advanced T-SQL programming knowledge
- Knowledge of software development and user interface web applications
- Advanced knowledge of HA/DR
- Moderate understanding of storage systems and RAID
- Familiarity with SQL Server Always-On Failover Clustering with Availability Groups
- Familiarity with ETL and reporting tools (SSIS and SSRS a plus)
- Familiarity working with .Net Framework, JavaScript, HTML and Oracle
- Familiarity with database Performance Tuning/DMVs/Execution Plans/Query Optimizer/Profiler
- Ability to work independently with minimal supervision and assistance
- Ability to work with a team and communicate effectively
- Ability to understand front-end users requirements and a problem solving attitude
- Ability to work in a fast-paced, distributed and dynamic environment, managing workload based on concurrent priorities
- Excellent written and verbal communication in English, ability to work with colleagues remotely
- Experience in Agile or SCRUM practices
- Deep knowledge of:
 - C#
 - NET MVC (v5)
 - HTML 5
 - JavaScript and jQuery, Ajax
 - CSS 3
 - NET
 - Good knowledge of:
 - Dependency injection and IOC
 - Multitier architecture
 - Visual Studio, VSTS or TFS
 - Visual Basic .NET

REQUIRED Experience:

Minimum 5 years of SQL Server Administration/Development

Job Type: Full-time

Location: Sacramento/Roseville/Elk Grove
